

# Erick Garcia O'Higgins

## Senior Data Analyst / BI

Cúcuta, Colombia · Remote / Global | +57 320 659 3567 | erick.garciaohiggins@gmail.com | linkedin.com/in/erickgarciaoh | github.com/erickgarciaoh  
| English C2 / Spanish Native

Senior Data Analyst / BI professional with 6+ years of hands-on experience in analytics and data operations across enterprise financial-services environments, supporting clients including Capital One, Visa, and CitiGroup. Deep expertise in T-SQL (query optimization, stored procedures) and Power BI (DAX, data modeling, DirectQuery), building end-to-end pipelines from data ingestion to executive-facing reporting. Designed incentive/bonus calculation models, KPI scorecards, and root-cause analyses that helped drive SLA compliance from ~40% to 80%. Comfortable working close to the data in Python (pandas) and comfortable adopting AI-assisted tooling to speed up analysis and review. Bilingual (English C2 / Spanish native) with extensive experience in remote, globally distributed teams.

### CORE SKILLS

**Data & SQL:** T-SQL (advanced) · Query optimization · Stored procedures · SQL Server · ELT/ETL pipelines (daily/hourly refresh) · Data quality & integrity

**Analytics & BI:** Power BI (DAX, data modeling, DirectQuery) · Tableau · KPI & metric framework design · Executive dashboards · Root cause analysis

**Programming & AI:** Python (pandas) · R (statistical analysis) · AI-assisted analytics workflows

**Domain:** Financial services (banking/payments) · Workforce & SLA analytics · Incentive & bonus modeling · Digital-asset / crypto operations

### EXPERIENCE

#### Business Intelligence Manager — Teleperformance Colombia Oct 2024 – Present · Remote

*BI delivery across 8+ enterprise accounts (Capital One, Citigroup, Visa, Amynta, LanguageLine) — ~3,000+ employees, 1.4M+ monthly interactions.*

- Own end-to-end analytics across ingestion, transformation, storage, and reporting — deciding which questions are worth answering and building the infrastructure to answer them at scale.
- Engineered and optimized ELT/ETL pipelines with daily and hourly refresh cycles across ~3,000+ employees and 1.4M+ monthly interactions, improving query runtimes, reliability, and scalability.
- Designed SQL data models, KPI/SLA metric frameworks, and Power BI dashboards driving operational and financial decisions for VP-level stakeholders.
- Drove SLA compliance from ~40% to 80% and operational satisfaction with BI support (OSAT) to ~90% via process standardization, metric definition, and data-quality controls.
- Selected by the Capital One Director to lead BI delivery across multiple enterprise accounts upon promotion to Manager.

#### Business Intelligence Analyst — Capital One Account — Teleperformance Colombia Mar 2022 – Oct 2024 · Remote

*Built the Capital One account's performance-intelligence infrastructure from the ground up (~1,200 HC / 615K monthly interactions).*

- Authored and optimized T-SQL queries (transformation, extraction, storage), improving report accuracy and data availability for Operations, QA, Workforce, and Training.
- Designed the Power BI reporting suite and KPI scorecards from scratch; later adopted as the standard for other vendors on the account. Automated 80% of data ingestion and reporting updates.
- Designed incentive and bonus calculation models aligning operational metrics with performance-linked compensation; delivered executive-facing ad hoc analysis under high-priority deadlines.

#### Digital Assets & Financial Operations Specialist — MassEmarketing LLC. Feb 2018 – Sep 2021 · Remote

*Crypto / digital-asset financial operations.*

- Supported financial operations for an escrow-based digital-asset platform; performed KYC verifications and maintained accurate transaction records to mitigate fraud and ensure compliance.
- Built structured financial tracking models (volume, pricing, profitability) and analyzed market and pricing trends to optimize transaction timing.
- Led the shift from direct asset sales to active trading operations, overseeing \$200K+ in capital with data-informed trading and risk-management strategies.

**Earlier: Linguistic Data Specialist**, Palazzo Languages (2023–2024) — AI-assisted dataset design & validation. · **Customer Engagement Specialist**, Teleperformance (2021–2022) — self-built Excel→Power BI dashboard (+60% tracking) → promoted into the Data Office.

### EDUCATION & CREDENTIALS

**B.S. Computer Engineering** — Alonso de Ojeda University (2009–2014). Focus: Systems Architecture & Data Communications; Statistics I & II. Thesis with Publication Distinction.

**Certifications & Languages** — EF SET English C2 Proficient (79/100, 2023). English (C2) · Spanish (Native).
